# TECHNICAL SECTION - BRAKE DISCS

STREET FRONT

- **THE ONLY** complete range of MC discs
- Hub and rotor complete units, bolt on and go
- Lightweight forged aluminium centre hubs
- Roll forged **BILLET STEEL** disc rings
- Sturdy riveted construction

The EBC Pro-lite series has become an aftermarket standard worldwide because of its very close similarity to the original disc but offering a higher friction (18% extra) braking power over stainless steel and being a safe, riveted, sturdy construction as opposed to the risky circlip system used by some of our competitors. If the OEM manufacturers thought circlips were a good idea, they would have put them on the original bikes. It is also worth explaining to your customers the false economy of buying replacement rotor ring kits with the risky circlip system. (See buyers guide for hub colours).

## New Contour Discs

### Front floating designs

A universal rotor that fits both left and right sides of the motorcycle, made with tough semi-stainless rotor rings mounted on forged aluminium centre hubs with the traditional EBC high security riveted hardware. Contour discs not only look modern, they are lighter than most other aftermarket and original discs. (All come with gold centres).

### Rear solid designs

With contoured profile to reduce weight, rear versions of this new programme are made in HPSR steel and zinc plated to avoid corrosion.

How To Order

Select disc no. from application pages. Prefix with "MD" for Prolite and then suffix with "LS" or "RS" for left or right. For new contour discs use suffix "C".

STREET REAR

- Unique birdswing drill pattern prevents ridges
- Tough HPSR steel prevents cracking
- Silver zinc finish to prevent corrosion

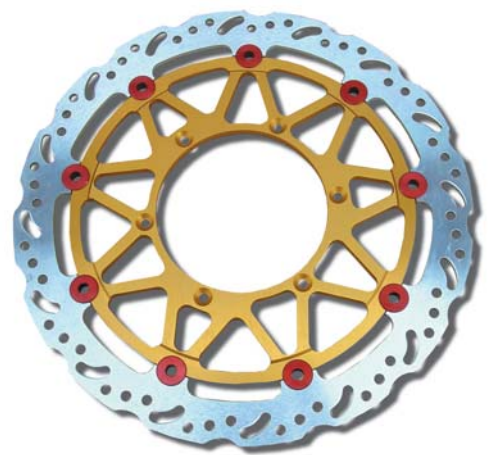

Standard replacement discs for modern streetbikes made with the EBC unique birdswing drill pattern. Holes overlap such that as pad and disc wears, no ridges are generated, pads stay flatter and last longer.

How To Order

Select disc no. from application pages and prefix with "MD"

SUPERMOTO

320mm oversize conversion discs with brackets designed to fit most standard wheel hubs on modern enduro bikes.

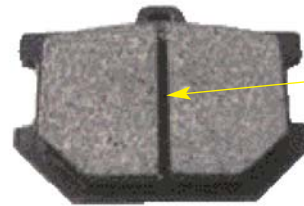

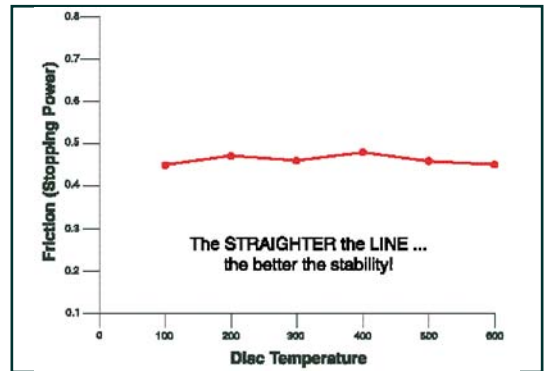

# TECHNICAL SECTION - BRAKE PADS

## Organic Streetbike Pads

Made in our own factory in Bristol, England, the EBC Kevlar series has now been re-named NAO series or Non Asbestos Organic, although we still use the famous Dupont Kevlar® fibre in conjunction with other high tech fibres that have come on the market. The NAO series are a superb all round value-for-money replacement for all levels of motorcycle and are still extremely popular with many riders who prefer the "feel" of organic pads. NAO series are fully TUV tested and KBA certified and conform to the new ECE R90 brake regulations which are about to storm the European market. EBC is at the forefront of this technology and will be the first on the market to offer Reg. 90 approved pads and packaging.

- Still number 1 selling EBC formulation
- German Motorrad magazine tests rated these above most organics
- KBA Approved and will comply with Reg90
- Typical organic "feel" which many riders prefer

Most EBC organic pads have expansion groove which reduces noise and prevents cracking

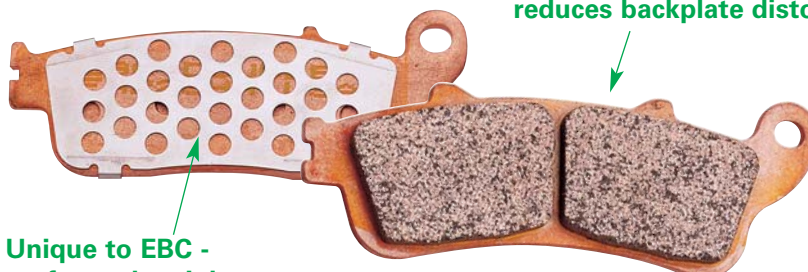

Aramid fibre compound with non-ferrous particles to prevent surface "scorching" under load

## WHICH PADS WORK BEST ...

For almost 30 years Harley riders have appreciated the softer organic pads (EBC Kevlar® formula pads) which offer fingertip stopping, great brake feel and much less rotor damage. EBC now also offer longer lasting American made sintered metal pads for improved life.

# The EBC 2007 4 or More Dealer Brake Disc Promotion

To enable dealers to have a physical example of our brake discs, we have created 4 beautiful displays which are actual EBC discs (made 1mm undersize so they cannot be used) on heavy plastic stands. There are 3 disc stand designs with part numbers shown below. These are free of charge to distributors and allocated according to turnover UPON REQUEST. Distributors should order these to EBC who will verify for realistic quantities requested and supply accordingly. In order for the dealer to obtain one of these displays, he needs to order 4 BRAKE DISCS from that group, in other words, to get the Pro-lite display he needs to order any 4 Pro-lite discs. Each display comes complete with a dual purpose leaflet holder which either attaches to the disc display using the hooks on its front, or can be left free standing as shown in the illustration below.

Recommended Fittings: FA400 for use on polished or chrome show rotors. FA400HH recommended fitting as replacement for O/E.

FA400 will replace FA299 when stock exhausted. FA400 has modified larger pad area to improve braking.

NOTE :- Some models may have a second disc fitted as an optional extra. Please double check with your customer exactly which side the front disc is fitted and if twin disc or single. For new style discs see pages 10 & 11.

## EBC ORGANIC PADS

Organic pads are suitable for all rotor qualities but especially we received on polished or chromed rotors being less prone to cause rotor damage. The fingertip /instant brake response is quickly appreciated.

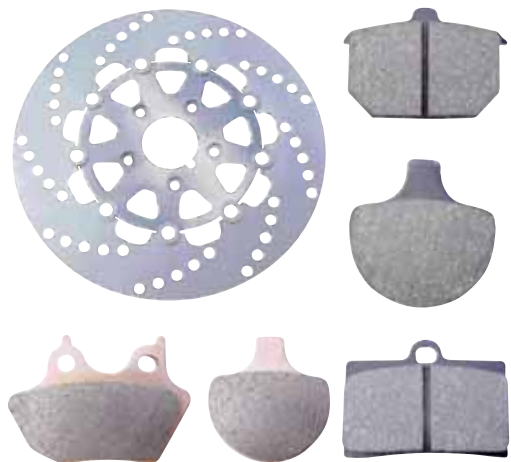

## EBC SINTERED HH PADS

Sintered pads give stronger brake effect and are ideal for heat treated stainless/original discs.

## EBC FLOATING ROTORS

Again, 100% British made with polished chrome hubs and unique low carbon rotors for improved stopping power. Rotors come in standard 11½" size which bolt on without mods and utilise standard HD calipers.

Advantages of floating rotors are - better braking, no rotor distortion, reduced chance of rotor cracking, improved brake alignment, stylish looks.

# CLUTCH KITS FOR STREET/DIRT/ATV

## STREET - 2 choices

### 1. Standard - CK Series

Almost identical to original equipment clutch plates the CK series are a cork based product impregnated with aluminum particles to increase wear life and heat resistance. Material is highly compressed to avoid swell and clutch drag and is an ideal general purpose replacement material for all grades and sizes of motorcycle. Kit includes a complete "engine set" of friction plates only.

### 2. Race/Sport

#### SRC Kevlar Series

A Kevlar paper lined plate set complete with heavy duty clutch springs<sup>1</sup>, the SRC kit is ideal for heavy sport bikes, faster riders and production based race use. Advantages of the SRC Kevlar series are longer life, higher heat resistance, although this clutch has a more aggressive/faster take up than the CK cork series. (Does not include steel plates)

<sup>1</sup> If bike has a diaphragm type spring fitted as standard we cannot supply this type of spring.

## DIRT/ATV - 3 choices

### 1. Standard - CK Series

Cork based replacement clutch exactly the same as used on the street series CK clutch plates described above. A general all purpose replacement unit.

### 2. Full Kit - DRC Series

EBC DIRT RACER clutch sets are a complete set of CK series heavy duty cork based lined plates plus heavy duty clutch springs and steel separator plates. Many off road machines are fitted from new with alloy separator plates which wear out quickly and cause clutch to slip. The steel units in the EBC DRC kit prevent this and re-establish original clutch stack height.

### 3. Race - 'EP' Kevlar Series

A complete kit with Kevlar lined friction plates, steel separator plates and heavy duty clutch springs. The EP kit is a heavy duty high temperature resistant clutch, suitable for sport/race use in Moto-X and ATV applications. For 1998 some models have been upgraded to have lined plates using a steel carrier body which should be located closest to the inboard or engine side of the clutch and compensate for overload fractures which happen when the clutch basket wears or "spreads". Denoted by 'S' suffix after part#.

**IMPORTANT NOTE: WE DO NOT RECOMMEND THE USE OF FULLY SYNTHETIC OILS WITH THESE CLUTCH KITS**

## EBC "EP" KITS The STRONGEST off Road Clutches money can buy - in KEVLAR

EBC new "EP" KITS are built with US MADE Dupont Kevlar fibre friction plates - High Durability STEEL intermediate plates to prevent early wear and distortion BUT as a world FIRST we give you a Extra steel and Extra friction plate in every set. With Alloy drive fingers these plates wont "dog" your clutch basket plus with 15% more friction area you get better drive and the high heat resistance of KEVLAR facings. New Destressed drive plates reduce chance of fracture in toughest conditions.

### CSK Spring Kits

Always fit new springs which get tired after miles of heat and use.

EBC spring kits are 10% stiffer than standard and are sold in engine sets.

As stated in general fitting/safety instructions, advise customers that lever will feel slightly 'heavier' when uprating springs, and to test ride/acquaint themselves with this change in control.

NOTE- IN SOME CASES YOU MAY END UP WITH 1 OR 2 EXTRA SPRINGS - THIS IS DUE TO SOME BIKES USING THE SAME SPRINGS BUT IN DIFFERENT AMOUNTS.

# EBC CLUTCH KITS

## EBC HEAVY DUTY CLUTCHES & SPRINGS

EBC Clutches are totally Asbestos Free made from a cork based "anti-swell" facing impregnated with aluminium particles to reduce wear & heat fade. Kits are sold in pre-measured engine sets and should always be replaced in engine sets. **USE ONLY MANUFACTURERS Drive case oils and avoid lead or other anti-friction additives. DO NOT USE FULLY SYNTHETIC OILS. SOAK PLATES in drive case oil before installing. EBC Clutch Springs are 10-15% stiffer than stock springs to avoid slip. Always check lever operating pressure for ease of clutch disengagement before riding or releasing motorcycle for use.**

### CAUTION - SAFETY WARNINGS FOR CONSUMERS

The following warnings now appear on the underside of our clutch packaging. For stocks in older packaging that do not display these safety warnings, we strongly recommend you photocopy these essential points and advise customers. Never start a motorcycle whilst in gear with clutch depressed. Never reverse a motorcycle with the engine running, the machine in gear and clutch depressed. Hold front brake lever on when selecting gears from standstill. Never engage gears from a standstill with engine revs above 1500 rpm. Check oil levels regularly. When fitting heavy duty clutch springs acquaint yourself with increased hand pressure required to depress clutch before riding motorcycle.

# OVERSIZE MX DISC FRONT FLOATING CONVERSIONS

280mm oversize design with a fully floating construction made from heat treated carbon steel. Comes complete with brackets - front applications only available. This extremely popular range of oversize discs has become a worldwide number one seller. The optimum 280mm design gives a significant improvement to stopping power but also great modulational/control without the risk of 'grounding' on excessively over diameter units. The rotors are quick and easy to fit with beautifully crafted brackets made by Ted Devol in the United States, available for all recent modern moto-x machines. (80/85cc bikes use 250mm oversize not 280mm).

## BAFFLE PAC

### BAFFLE-PAC-Silencer Glass. PART NO. BP-1

This material is labelled and conforms to BSAU 193T2. BEWARE of distributors selling cheaper roofing felt in its place. Repackable Tailpipes as the name implies require regular cleaning and repacking with BSAU approved "SILENCER GLASS" such as Winning BAFFLE PAC. Failure to maintain tailpipes in such a way will lead to clogging of the silencer wool and raised noise output together with reduced engine performance. Freeman Automotive (nor Dealers) are responsible for noise offences due to lack of maintenance as described above. "Recommended repacking period is every 3000 miles on two-strokes or when bike becomes noisy if sooner".
